

A Modest Selection of Professor Paul Younger's Measured and Scientific Contributions to Academic Debate

Published comments by Professor Younger about Professor David Smythe

once more shamelessly using your *emeritus professor* status *proceeding* to **misrepresent not only geosciences generally**, and **hydro**geology in **particular** (of which *you are clearly deeply ignorant*) groundwater **pollution**, which **YOU pretend TO KNOW ABOUT**, despite your **utter lack** of hydrogeological background the **HEIGHT OF DISINGENUOUS UNPROFESSIONALISM** *no attempt whatsoever to engage with* the current generation of researchers you *presume* to **opine in public**, with your **customary hand-waving** and **ill-informed, crowdpleasing prejudice** your **specious claims** that the geology of Scotland is **somehow** so *uniquely complex* that the **general principles of groundwater hydraulics do not apply** here. **This is stuff and nonsense**, *as you know*, **OR SHOULD KNOW IF YOU PROPERLY READ ANY LITERATURE** on the matter **other than your own outpourings** *I shall not hesitate to denounce* your *charade of pretended knowledge*, and **expose** your **much-vaunted links to the University of Glasgow** for the **cold historical artefact** that they *are*

... **not qualified** to give expert evidence on fracking.

He **falsely claims** to be a chartered geologist. That's

FRAUDULENT. It's

wilful **untruth**

I am **CONCERNED** about the **DAMAGE TO THE REPUTATION OF THE UNIVERSITY** by

someone **who never fails to use his university affiliation**

He has published **nothing** on [shale gas] in any **proper** scientific forum – **NO DOUBT**

BECAUSE HE KNOWS HE WOULD NEVER GET PAST PEER REVIEW with his

**PSEUDO-SCIENTIFIC
SCAREMONGERING**
